

Moving Water is Solar Business

Surface Pump Solution

Solar Pumping system

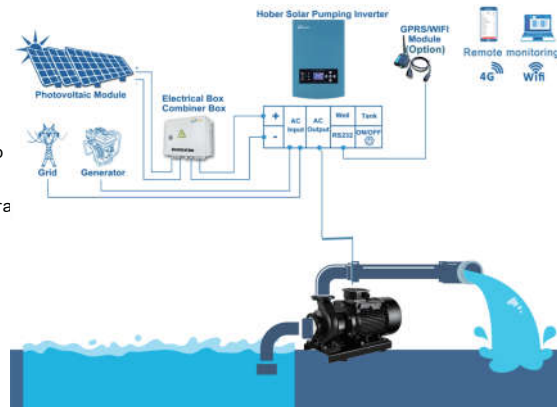

COMPANY PROFILE

Hobertek is a professional factory specializing in the research, development, production, and sales of solar water pumps and inverters. We are committed to providing efficient and reliable solar water supply solutions for customers worldwide. With advanced production equipment and strict quality control, we continuously optimize product performance to meet the needs of different markets.

Solar Surface Water Pump

A solar surface pump is a solar-powered pump designed to draw water from shallow sources like rivers, lakes, ponds, or tanks for agriculture or domestic use. Unlike submersible pumps, it operates above the water surface and is powered by solar panels that convert sunlight into electricity.
